# Using Posters and Deep Learning to Recommend Anime & Mangas

Jill-Jênn Vie, PhD RIKEN Center for AIP, Tokyo

July 5, 2018

#### Outline

#### Mangaki

- ► Recommender system for anime & manga
- ► Why nonprofit?

#### Research

- ▶ The geometry of mangas
- Deep learning: learning from massive data (it's all blocks)
- Our new algorithm (name will come, wait for it)

#### **Future**

**▶** ???

### Mangaki, recommendations of anime/manga

#### Rate anime/manga and receive recommendations

#### 2,000 users, 10,000 anime/manga, 350,000 ratings

- myAnimeList (RIP their API)
- ► AniDB
- AniList
- (soon) TVtropes

## Mangaki

# Build a profile

Steins;Gate	
Suzumiya Haruhi no Shoushitsu	
Suzumiya Haruhi no Yuuutsu	
Terror in Resonance	
The Night is Short, Walk On Girl	
Time of Eve	
5 centimètres par seconde	
.hack//Liminality	
.hack//Sign	
A Certain Scientific Railgun S	

## Mangaki prioritizes your watchlist

Pokemon: Lucario and the Mystery of Mew	
Dimension W	
Haibane Renmei	
A Silent Voice	
Neon Genesis Evangelion	
Mind Game	
Record of Lodoss War	
Ghost in the Shell: Stand Alone Complex	
Neon Genesis Evangelion: The End of Evangelion	
Angel Beats!	

## Browse the rankings: top works

# Why nonprofit?

- ▶ Why should blockbusters get all the fun/clicks/money?
- ▶ Maybe there is one precious, unknown anime for you
  - ▶ and we can help you find it
- Driven by passion, not money

Everything is open source: github.com/mangaki (Python, Vue.js)

Awards: Microsoft Prize (2014) Japan Foundation (2016)

## Browse the rankings: precious pearls

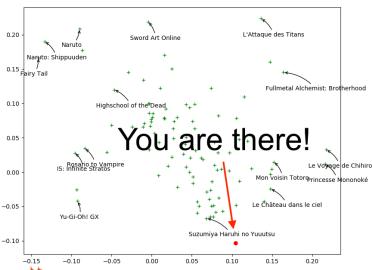

## Embedding you in the geometry of mangas

#### Many blocks for recommendation

KNN K-Nearest Neighbors

**ALS** Alternating Least Squares

FMA Factorization Machines

Input: ratings

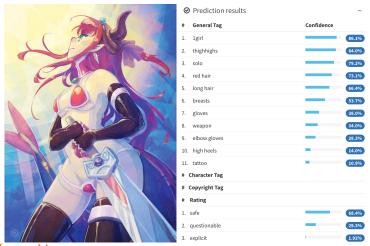

**Output:** representation of users and items

(geometry used for reordering & recommendation)

# A new block appears!

#### Illustration2Vec (by Masaki Saito & Yusuke Matsui, 2015)

# We have (many) posters

## Existing algorithms

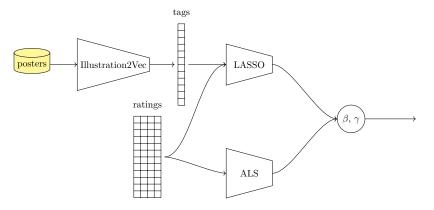

ALS Take ratings  $\rightarrow$  recommendations Does not work when no ratings are available (ex. new work)

LASSO Take tags/ratings  $\rightarrow$  recommendations Does not take care of people with similar taste

I2V Take posters  $\rightarrow$  tags

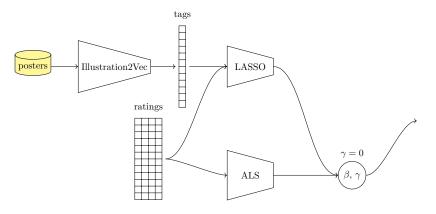

Combine blocks
Use machine learning to select the best model

## **BALSE**

#### Our paper BALSE was accepted at the MANPU workshop!

#### **MANPU 2017**

The Second International Workshop on coMics ANalysis, Processing and Understanding

November 10, 2017 Kyoto, Japan

To be held in conjunction with the 14th IAPR International Conference on Document Analysis and Recognition (ICDAR 2017).

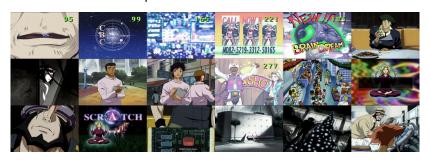

#### Genuine excerpt from the reviewers

Two models individually are existing methods, but this work presents a novel fusion method called Steins gate to integrate results given by two models.

## Make your neural network look at the manga

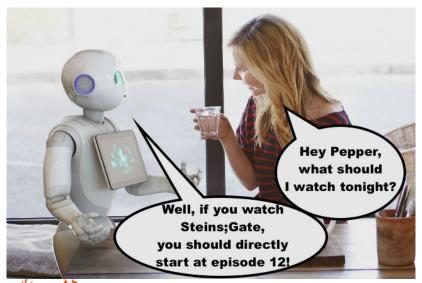

#### Extract frames from episodes

Cowboy Bebop EP 23 "Brain Scratch", Sunrise

## Watching assistant

### Take home message

- Using machine learning, you can predict the future
- Machine learning is made of many blocks put together
- But they need data
- ► To get data, interoperability is super important
  - ► Let's work together to pair myAnimeList / AniDB / TVtropes!
  - Contact us to know more

### Still, there are things we can never predict

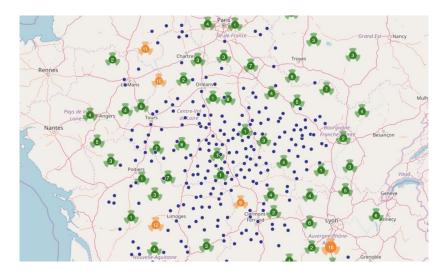

If you told me this shit would happen like 3 years ago I would've laughed at your face

# Thanks! Do you have any questions?
